Farmers Mutual Telephone Company dba Snake River PCS
CC DOCKET NO 94-102
Interim Status Report for E911 Phase II Compliance

- **The number of Phase I and Phase II requests from PSAPs (including those the carrier may consider invalid);**

We have not had any formal requests for Phase I or Phase II service. The Payette County Sheriff has indicated that he will submit a formal request for Phase I in the near future but a physical request has not been received.

- **Specific technology choice and status of implementation**

Farmers Mutual Telephone Company, dba Snake River PCS has elected a handset-based solution for our CDMA 1900 PCS network due to the rural nature of the area we serve. As towers are sparsely located in our network, triangulation is almost impossible for a location solution.

We have not received a request at this time; implementation has not begun.

- **Status on ordering and/or installing necessary network equipment:**

Our Nortel DMS100 MTX10 switch and software load are Phase I and Phase II compliant. Vendor presentations for data base services are currently being reviewed. There has been no lack of interest in providing solutions for the small carrier. Direct trunking is currently in place to support one of our four PSAPs and the only selective router in our network

- **ALI – capable handsets**

ALI-capable handsets are available. We currently have Kyocera models 2325 and 7135 and Motorola models T720, 120e and V.60i that the manufacturers claim to be ALI-capable. We have not encountered any issues with obtaining these handset models. Testing has not occurred as our PSAPs do not have the equipment to test and we have not yet selected a database provider.

- **Estimated date of Phase II implementation**

We estimate that Phase II service will be available by 2nd quarter 2004 at the very latest for all PSAPs requesting the service. We anticipate the ability to meet the 6 month implementation deadline should we receive a valid PSAP request prior to that time.

- **Schedule to meet the ultimate implementation date of December 31, 2005**

We do not anticipate any difficulty meeting this deadline.

Respectfully submitted,

A handwritten signature in dark ink, appearing to read "Jay Garrett".
